

Anti-Aging Acupuncture and Osteopathy Facelift

Justine Vo has magic hands and a gentle heart. I have been going to Justine for alternative medical care for some time now, but I have turned to her for my skin care and anti-aging regimen. I am a 62 year old woman and although I have always enjoyed the good fortune of looking years younger than my chronological age, newly-acquired wrinkles were threatening to change all that. Justine has reversed time by giving me back my youthful appearance.

I know that many in the beauty biz claim to do non-surgical facelifts, but the difference is that Justine actually has the educational background and experience to do it effectively. She knows what she's doing and does it well! Justine expertly applies her extensive knowledge of medical acupuncture and osteopathy to perform non-surgical facelifts.

The first time I peered into a mirror after my initial non-surgical facelift by Justine, I spontaneously and unexpectedly let out a "Wow!" I'd entered Justine's place wondering if it was time to give in and go under the knife, as my wrinkles/crinkles were interfering with my self-confidence. Well, Justine carefully assessed the state of my skin, my bone structure, and general health - then she gently placed the acupuncture needles in the appropriate spots. Twenty minutes later, after removing the needles, Justine started to massage and coax the lines and creases into oblivion. I was totally surprised by the great results. No more thoughts of plastic surgery now! Why risk surgery when you can have a non-surgical, youth-restoring facelift!?

It really does seem like magic! After only a couple of sessions, my crinkles have softened significantly, taking off years (and taking years off my 62 year young face is a very good thing, I think). Picture spending an hour relaxing as a highly trained professional (Justine's medical/beauty credentials are impressive, to say the least!) gently caresses your face into its best, crinkle-free (don't you find that word so much more attractive than "wrinkle"?) appearance. Now you kind of get the idea. But there might be even more in store for you, because there are healthy side effects of the non-surgical facelift. Maybe for you it'll be improved sinuses, or maybe diminished headaches, or maybe something else. But whatever your particular health benefits, I'm pretty sure you'll feel as good about having your non-surgical facelift with Justine as I do with mine!

I am a real person just like you. I am sincere in making these comments about my experience with Justine's non-surgical face lifts. If I didn't believe in their effect, I wouldn't be giving this testimonial. I hope that you give her a chance to help you, too. I know that you will enjoy the experience and I am sure that you will enjoy the results.

Thanks, Justine! Ruth Howard, Toronto – February 2009
