

Knee Pain and Injury

Justine has a God-given gift to help in the healing process of her clients' physical conditions. As a Registered Nurse, I have been amazed to see the rapid healing and repair of tissues, bones and GI problems in the friends and family I have referred to her. As a client myself, I saw her for a painful swollen knee. After one treatment, the swelling and pain were gone and have not returned since. Her genuine love, concern and care of each patient are evident. I would highly recommend her services.

Linda Bryant, RN – Brampton - 2010

I have met Justine once and with one treatment for my osteoarthritis she has made my knee 100 percent better. She is very understanding of the needs of others and takes the time to explain everything in great detail about your affliction. I have finally found a true and dedicated lady who is very serious in her line of work. She gives me hope that I never had about removing the pain in my knees. I will attend her practice for as long as it takes. From the first session I find that it will not take long. It's been 10 years of going upstairs on all fours.

I wish Justine all the best in her practice. I truly found a great healer and I recommend people who suffer from chronic pain to talk to Justine.

Mrs. Bernadette Ghosh – Burlington - 2010
