

Multiple Sclerosis

Thanks to Justine Vo's determination, passion and extensive knowledge of the human body, I have finally found the ideal therapist to alleviate my chronic physical pain from Multiple Sclerosis. But, the benefits from my treatments do not end there; my mobility and flexibility are both returning at a remarkable pace, my energy level is up and consistent, I can now get on and off my motorized scooter without any assistance and the list goes on and on. Since beginning of my therapy with Justine Vo, less than 6 months ago, I have a renewed belief in my recovery and in myself that Justine has given me. Thank you Justine, because of your continued faith, nonstop motivation and your 'gifted' hands, we are on the road to healing together!!

Athina Commisso – Burlington – Oct. 2010

Due to Justine Vo and her intense therapy of my sister, Athina, who has suffered from MS symptoms for as long as I can remember, I have seen such dramatic results from her 'magical' hands. Justine seems to have an endless knowledge of how the human body works and continues to practice her recovery treatments with such 'gusto', that the results seem to be endless. I have, first hand, seen my sister able to get up and walk, with very little assistance around the room, which has not happened in years. I see her therapy of my sister as just the beginning stages in her road to once again having the independence she has been missing! I see Justine as my sisters' own personal healer, who will not stop until she sees my sister walk into her office on her own two feet without ANY assistance!
